ABOUT ME

As a front-end developer, you're responsible for creating the visual and interactive aspects of a website or web application—the parts that users directly interact with. Front-end development involves working with languages and technologies that handle the structure, style, and behavior of a website. Here's an overview of the main skills and technologies used by front-end developers

Core Technologies:

HTML (HyperText Markup Language): The backbone of any web page, HTML provides the structure

CSS (Cascading Style Sheets): CSS controls the presentation, layout, and design of the website.

JavaScript: The programming language that brings interactivity to the web

SKILLS

- Html,
- CSS
- JavaScript,,

EXPERIENCES

- "I am a front-end developer with [1] years of experience in building responsive and user-friendly websites and web applications. I specialize in HTML, CSS, and JavaScript, and have hands-on experience with frameworks like [React/Vue/Angular] to create dynamic user interfaces. I focus on clean code, performance optimization, and ensuring a seamless user experience across devices."
